THE SCENARIO

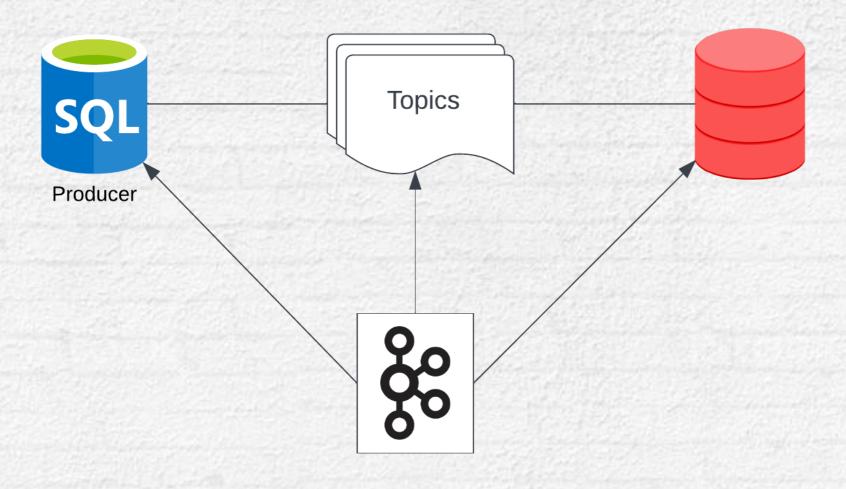

Native Replication

Heterogeneous replication

The problem

- No official support
- Only Oracle was available
- No heterogeneous replication from the Pgsql side
- A third-party tool would be somewhat expensive

Possible solutions

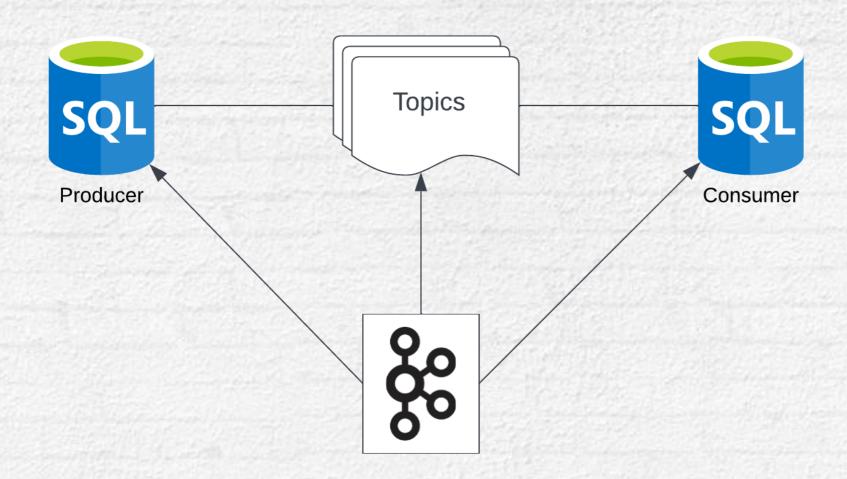

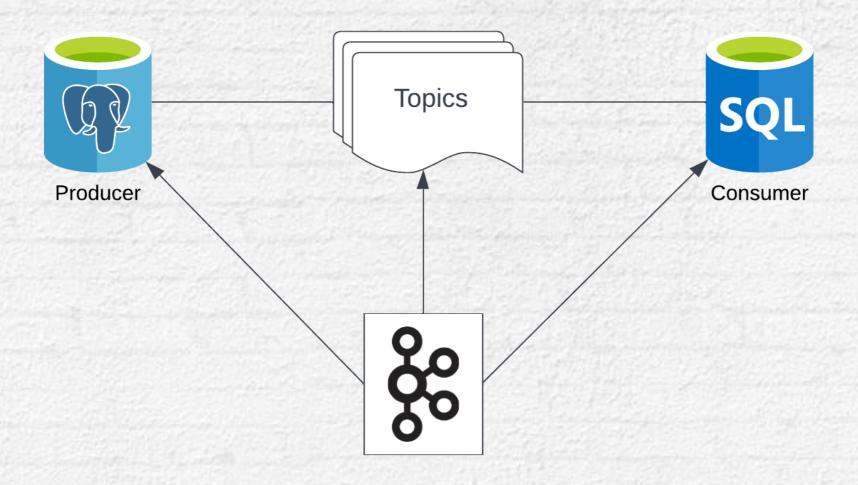

Enter Apache Kafka

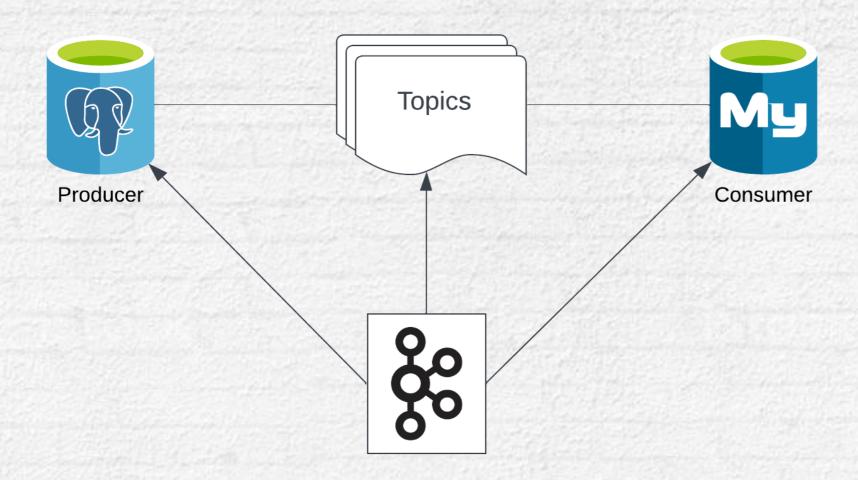

Enter Apache Kafka

Enter Apache Kafka

SOLUTION 1

"Manual" Kafka

Manual Step-by-step

- 1. Define a data source or Producer
- 2. Define a data destination or Consumer
- 3. Install the Confluent Kafka platform
- 4. Install the required drivers
- 5. Create the connectors using the drivers
- 6. Monitor the Data flow
- 7. Sit back and relax!

Demo

Setting up the Confluent Platform

SOLUTION 2

Cloud Kafka

Confluent Cloud

RECAP

Two solutions for replicating Data thru different Database technologies:

- Using Apache Kafka and setting it up manually
- Using Confluent Cloud within your provider of choice
